

# **India is estimated to be the Diabetes Capital of the world by 2030**

*“In modern India, Diabetes is spreading like an epidemic and India is estimated to be the Diabetes Capital of the world by 2030. The present Diabetic population in India is 6.2 crores; which is spreading like wildfire and persons in the younger age group - less than 30 years-are falling prey to it. The reasons are obesity, lack of exercise, sedentary lifestyle, and stress. Diabetes works like a silent killer & uncontrolled blood sugar levels, slowly start affecting Kidneys, Heart, Eyes and Nervous system.*

*As a pioneer Japanese company to manufacture first Artificial Kidney in India, we are aware of the magnitude at which Diabetes attacks the kidney, and damages it permanently.*

*Thus, we have strengthened the initiative of ‘Diabetes Awareness’ across the society to help millions of people with diabetes to enjoy a better quality of life. This allows us to provide high-quality, Diabetes management solutions suiting your lifestyle.*

*Our continuous endeavor is to spread awareness about Diabetes and we are extremely proud to be associated with many Corporate giants, Government Offices, NGOs, Human Welfare Organizations, Educational & Non-Profit Organization, for whom we conduct Diabetes Awareness Sessions, and Diabetes screening programmes on regular basis. We would love to be your partner in conducting such sessions for your organization which will benefit not only your employees, but their families too and can prevent them from falling prey to this life threatening disease, and lead a healthy life style.*
